STEPHANE DEDU

FullStack Developer

PROFILE

Passionate about web development, I have gained solid expertise in front-end and back-end technologies through real-world projects and in-depth training. Holding a Bac+2 degree in web development, I am actively seeking a professional opportunity as a front-end or full-stack developer. Available immediately.

EXPERIENCE & PROJECTS

Car Rental (Front-End Development)

Developed a responsive web platform for car rental with a modern and intuitive interface, optimized for user experience.

Technologies: React, TypeScript, TailwindCSS

- Key Features: Smooth navigation, dynamic vehicle display, responsive design.
- 🔗 [Live Demo](#)

Mon Vieux Grimoire (Full-Stack Development)

Designed a web application allowing users to rate and review books with a secure account management system.

Technologies : Node.js (Express.js), React, MongoDB

Key Features:

- REST API for managing books and reviews
- Secure authentication with JWT
- Image upload and optimization (compression, resizing)
- Responsive and ergonomic interface

Gym Website

Developed a modern and responsive interface for a gym website, offering a seamless and optimized user experience.

Technologies: React (TypeScript), Tailwind CSS

Key Features:

- Responsive and dynamic design with Tailwind CSS
- Smooth and high-performance user experience with React and TypeScript
- Intuitive navigation and optimized interface
